EDUCATION

Computer Systems Technology - Software Development

Sep. 2022 – April. 2027

Mohawk College

Hamilton, ON

Relevant Coursework: Emerging Web Technologies (React, Node.js), Client-Side & Server-Side Web Programming (JavaScript/PHP), Data Structures & Algorithms, Database Theory & Advanced Databases, Cloud Computing, Software Quality & Testing.

EXPERIENCE

Web Developer

May. 2025

Duplacey's Barbershop

Hamilton, ON

- Designed and built the business's official website using Next.js, Tailwind CSS, and TypeScript.
- Deployed a fast, mobile-friendly site indexed on Google to increase local visibility.
- Collaborated closely with the business owner to gather requirements and deliver a tailored solution.

Software Developer

Jan. 2026 - April. 2026

Door Face Panels

Hamilton, ON

- Built a demo ready Flutter mobile prototype for a smart door platform, translating UX mockups into functional flows across Home, Devices, Automations, Security, and Account.
- Implemented core features including sign up/login, lock and unlock controls, access history, one-time guest QR access, and settings management using a FastAPI backend.
- Collaborated with a multidisciplinary team and incorporated direct client feedback to deliver a demo-ready prototype for investor presentations, usability testing, and future hardware integration

PROJECTS

Intellex | [Source](#) | *Next.js, React, TypeScript, Firebase, Tailwind CSS*

Jan. 2024

- Built a peer-to-peer skill-sharing platform that won **DeltaHacks X**, enabling users to teach skills via live video and earn NFTs.
- Automated testing with **Jest**, achieving comprehensive coverage and reducing manual QA effort.
- Reduced video call latency by **25%** through WebRTC integration and optimization.
- Implemented a secure serverless REST API using **Node.js** and **JWT** for authentication and blockchain-based transactions.

DeepEnd | [Source](#) | *TypeScript, React, Next.js, Firebase*

Feb. 2024

- Built a project-based learning app that placed **1st** in the McMasterU **Google Solutions Challenge**.
- Streamlined authentication and chat history linking using Firebase, improving user flow.
- Redesigned API routes for project generation by utilizing server-side REST API routes on Vercel with the OpenAI API, resulting in a **50%** increase in client-server interaction efficiency.
- Automated project descriptions using GPT-4 and prompt engineering, generating accurate summaries with **86%** precision.

BidBoard | [Source](#) | *Next.js, TypeScript, Stripe, PostgreSQL, Prisma*

May. 2025

- Built a public leaderboard web app where users pay to climb rankings, using Stripe Checkout and webhooks for real-time transactions.
- Attracted **5,000+ unique visitors** and generated over **\$100** in its first week through organic traffic.
- Developed backend API routes using Next.js and Prisma ORM, connected to a PostgreSQL database.
- Improved user experience and trust by iterating based on feedback from early users.

TECHNICAL SKILLS

Languages: Java, Python, C#, SQL (SSMS, SQLite), JavaScript/TypeScript, HTML/CSS, PHP

Frameworks/Libraries: React, Next.js, Node.js, .NET, React Native, Tailwind, Socket.IO, Flutter

Tools/Platforms: Prisma, PostgreSQL, Firebase, Expo, Azure, WordPress, Stripe, Git
